# Special Transport

Full Load Solutions

## Long, heavy and high- there are many possibilities

- Products such as profiles, tubes or shafts can easily be loaded on long wagons
- If the high axle load is not sufficient we supply wagons with additional axles.
- Several types of (semi-) low loaders offer solutions for high loads.
- There are possibilities for over- width and over-length

## Our advantages

### Large and strong equipment

- Wagons with 15, 18 and 25 meter long loading floor
- Axle loads of 20t and even more
- Several lowbed- or girder wagons available

### Unique in Europe

- An extensive European network
- One contact person, from the first contact to the delivery
- Pre- and on carriage possible

DB Cargo Full Load Solutions offers the experience in the cross-border transport resources that are essential for your full load transports.
